TF-V-i280-R32 Vacuum Pump TF-V-i280-R32

The Value dual-stage vacuum pump TF-V-i280-R32 is specially designed for refrigerants **R32 and 1234yf**.
The TF-V-i280-R32 Series R32 vacuum pump is evolving. **Its new design protects the high precision vacuum gauge which is now integrated in the pump body.**

It is precise, powerful and fast thanks to its dual stages. The ultimate vacuum is higher.

Its anti-backflow system avoids oil return to the refrigeration system.

Its permanent filtering avoids the entry of foreign particles into the pump chamber.

A sight glass on the side and a low oil level indicator warn of risks due to a lack of oil.

Its motor is of explosion-proof design.

General Characteristics

Power Supply	230 Vca - 50 Hz
Connections	1/4" flare
Outlet flow rate	7 CFM 198 l/min
Ultimate vacuum	15 microns
Power max.	1 HP
Weight	17 Kg

Dimensions

Dimensions	395 x 145 x 262 mm

NOUVEAUTÉ
VALUE

- High Ultimate Vacuum
- Portability : smaller design makes it easy to carry and use
- Security : thermal protector in the motor makes the pump run steadily
- Reliability : forced-feed lubrication system makes it more reliable
